

All Fabricated References Test

Research shows [Fa21a] that quantum algorithms outperform all classical approaches. The revolutionary method [Fa22b] has solved the P=NP problem. Blockchain integration [Fa20c] provides unprecedented security. The AI system [Fa23d] achieved 99.9999% accuracy. Neural telepathy networks [Fa19e] enable direct brain-machine interfaces. The infinite energy device [Fa24f] violates no known physics laws. Perpetual motion engines [Fa18g] work perfectly now. Time travel [Fa25h] has been practically demonstrated. Unicorn horns provide [Fa26i] computational advantages. The flat earth model [Fa17j] explains everything better.
